***Terminal Disclaimer***

1. The terminal disclaimer filed on 11/15/04 disclaiming the terminal portion of any patent granted on this application, which would extend beyond the expiration date of U.S. Patent No. 6,624,839 has been reviewed and is accepted. The terminal disclaimer has been recorded.

***Reasons For Allowance***

2. The following is an examiner's statement of reasons for allowance: Claims 70-72 are patentable over the prior art patents and printed publications because of the specific structure of the OLED print head, which includes a plurality of triplets of elongated arrays of individually addressable Organic Light Emitting Diode elements emitting light over a broad range of wavelengths, being deposited on the light receiving surface of a transparent substrate, a plurality of triplets of elongated arrays of color filter elements being deposited on the light emitting surface of the transparent substrate, wherein the distance between the planar light emitting surface of the color filter array and the light receiving surface of the photosensitive material, the thickness of the transparent substrate, the spacing between centers of the color filters and the characteristic surface dimension of the color filters are jointly selected to optimize the exposure of the photosensitive material. The combined limitations are not taught by the art of record alone or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
